

# Built to be first. Built to last.

Round shaft to reduce concrete build-up, and bolt-on Ni-hard wear parts.

Hydraulic pump with manual override in case of power loss.

Access to the drive coupling.

Easy access for all the drive components.

Introducing our new U.S.-built twin shaft mixer. It's manufactured from proven American components for easy maintenance. It includes class-leading features like air purge seals to prevent concrete leakage, and a drive package that can be removed as a single unit. And it's equipped with cast Ni-hard liners and paddles for a long life. Find out more about the first twin shaft mixer so durable, it may be the last one you'll ever need.
