Attn: Dave Ditch

Dear Mr. Ditch,

As Operations Manager for Submar, Inc at our main facility in Houma, LA, I have had the pleasure of working closely with Mixer Systems, Inc. From sales to service I couldn't have asked for more. I typically do not write testimonial letters because I think that my purchase should suffice as proof that I trust your product. I had to make an exception just this once. I want to make sure you use this letter as a means of furthering the great work that everyone at Mixer Systems does.

It has been just shy of two full years now that Submar, Inc has owned and operated our E100 batch plant we purchased from you in December of 2008. I have to say it has fit our company's needs to a tee. You really have made the whole process of purchasing, shipping and installing your skid mounted plants with planetary mixer such an ease. Our space requirements were accommodated with a designed lay-out given by your technical service department; even the hired installation crew was impressed!

I look forward to many more years of great service and even better relationships with Mixer Systems.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeremy Dant', with a large, sweeping flourish extending to the left.

Jeremy Dant
